DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: With respect to claim 4, the Prior Art does not teach normal field excitation supply unit is one of a plurality of normal field excitation supply units, each of which is associated with a different one of said synchronous motors, wherein said control unit responds to a failure of any one of said normal field excitation supply units to change the field winding system of the associated synchronous motor over to the standby field excitation supply unit. With respect to claim 8, the Prior Art does not teach the steps of connecting, detecting and automatically changing over are performed for each of a plurality of synchronous motors, and wherein said standby excitation supply field unit is shared by all of said synchronous motors. With respect to claim 9, the Prior Art does not teach a first synchronous motor including a first field winding system and a first field excitation supply unit, said first field excitation supply unit being in selective electrical communication with said first field winding system; a second synchronous motor including a second field winding system and a second field excitation supply unit, said second field excitation supply unit being in selective electrical communication with said second field winding system; and a standby field excitation supply unit being in selective electrical communication with said first field winding system or said second field winding system. With respect to claim 16, the Prior Art does not teach a first synchronous motor having a field winding system; a normal field excitation supply unit configured to supply a normal field excitation voltage, said normal field excitation voltage being sufficient to

Art Unit: 2837

operate said first synchronous motor synchronously; a standby field excitation supply unit configured to supply a standby field excitation voltage, said standby field excitation voltage being sufficient to operate said first synchronous motor synchronously; and at least one switching mechanism configured to apply either said normal field excitation supply unit or said standby field excitation supply unit to said field winding system.

Claims 2-4, 7-17 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
